As predicted! Once again in 2025, backed by a 100% probability rate, the month with the highest amount of rocket fire from Gaza occurred during a month when Mars was within 30 degrees of the lunar node(July 2025). Denying Mars influence at this point is choosing ignorance. Lets look at the data

For the past few years, I have been presenting data that showed a link between escalation of rocket fire from Gaza into Israel coinciding with the position of Mars within 30 degrees of the lunar node. Since 2005, there is a 70% probability rate that highest concentration of rocket fire during this period when mars is within 30 degrees of the lunar node will exceed that of the rest of the year. However, when it comes to the month that contains the highest amount of rocket fire during the calendar year, probability rate is 100%. I even accounted for this in the memorandum that forewarned of escalation from Iran and Gaza between June 5 2025 and Sept 4 2025. Here is the link (Archived because its being suppressed on Reddit)

<https://archive.ph/bllFT>

original link(reddit deleted it)

https://www.reddit.com/r/AnomalousEvidence/comments/1id6ccr/an_advisory_that_ull_military_mobilization/

In the memo it states:

At a probability rate of 100%, the month with the highest concentration of rocket fire from Gaza within the calendar year since 2005, is the month during which Mars is within 30 degrees of the lunar node. Since 2019, via youtube, social media, and academic papers in the form of memorandums, I have accurately predicted and assessed based on that very data, when Israel should have expected escalation to occur. Some of this information was sent to Israeli officials. Here is the data. The month with the asterisk indicates month with highest rocket total compared to other months of the year. Every single year, that month coincided with Mars within 30 degrees of the lunar node.

then it goes onto predict Gaza militant escalation between June and September when Mars is within 30 degrees of the lunar node:

Gaza militants will demonstrate a show of force during this time as well, continuing with the same pattern of escalated rocket fire coinciding with Mars being within 30 degrees of the lunar node.

Here is the data that was inserted into that memo which showed how in previous years, the month during the calendar year which contained the highest amount of rocket fire was a month that coincided with Mars being within 30 degrees of the lunar node. This is up to the year 2024. Observe the asterisk.

https://www.academia.edu/124394993/_Gaza_Only_Gaza_rocket_stats_and_planet_Is_correlation_Hamas_and_Islamic_Jihad_rocket_fire_against_Israel_since_2005

These stats pertain only to militants in Gaza and all rocket fire from Gaza into Israel since 2005

There is a pattern in which the highest concentration of rocket fire against Israel within a calendar year is occurring when Mars is within 30 degrees of the lunar node. This is happening at a rate of 70% since 2005.

In every single year since 2005, the month containing the highest rocket fire for the year is a month in which Mars had been within 30 degrees of the lunar node at some point.

Dates of Mars-within-30-degrees-of-the-lunar node

May 29 2005 - Aug 29 2005

Nov 17 2005 - Dec 27 2005

Jul 20 2006 - Oct 14, 2006

March 19 2007 - May 30 2007 Apr 28 2008 - Jul 31 2008 Jan 08 2009 - Mar 24 2009 Aug 24 2009 - May 02 2010

Nov 02 2010 - Jan 18 2011 Jun 11 2011-Sep 01 2011 Aug 24 2012 - Nov 12 2012 Apr 03 2013 - Jun 22 2013

Dec 19 2013 - Aug 28 2014 Jan 27 2015 - Apr 12 2015 Sep 27 2015 - Dec 26 2015 Nov 21 2016 - Feb 01 2017

Jul 11 2017- Oct 10 2017 Apr 08 2018 - Nov 14 2018 May 01 2019-Jul 29 2019 Jan 15, 2020 - Apr 3rd 2020

Below are future dates of Mars within 30 degrees of the lunar node

Feb 9, 2021 - May 13, 2021

Nov 4, 2021 - Jan 22, 2022

June 22, 2022 - Sept 19, 2022

Dec 26 2022 - Jan 24, 2023

Aug 24, 2023 - Nov 15, 2023

April 12, 2024 - June 25, 2024

June 5, 2025 - Sept 4, 2025

Feb 4, 2026 - April 19, 2026

Sept. 27, 2026 - June 12, 2027

For five consecutive years, I have been able to predict when the highest concentration of rocket fire against Israel would occur within a calendar year.

In the last five years it was predicted that the highest escalation of rocket fire within the calendar year would occur during the time when Mars would be within 30 degrees of the lunar node.

1. Jan 15th 2020 - Apr 3rd 2020 - <https://www.youtube.com/watch?v=e5GxO4ZW2fc>

Now this is the updated version with the year 2025. Notice that July of 2025 is the month when Gaza militants fired their highest amount of rocket fire compared to other months in the calendar year

These stats pertain only to militants in Gaza and all rocket fire from Gaza into Israel since 2005

There is a pattern in which the highest concentration of rocket fire against Israel within a calendar year is occurring when Mars is within 30 degrees of the lunar node. This is happening at a rate of 70% since 2005.

In every single year since 2005, the month containing the highest rocket fire for the year is a month in which Mars had been within 30 degrees of the lunar node at some point.
